

**AMENDMENTS TO THE CLAIMS**

**This listing of claims will replace all prior versions and listings of claims in the application:**

**LISTING OF CLAIMS:**

1. (Currently Amended) A cart (1) for transporting goods and objects, comprising a support structure (2) having a base (3) with wheels (10, 13) for transporting a first basket container (15), and a thrust part (5, 6) positioned posteriorly to the base (3), said thrust part (5, 6) being connected to the base (3) through an intermediate upright element (18) designed to be selectively inserted and removed to position said thrust part (5, 6) at a respectively greater or smaller height relative to the base (3).
2. (Original) A cart as claimed 1 in claim 1, wherein said upright element (18) is designed to allow the application of at least a second basket container (23) positioned overlying the base (3).
3. (Original) A cart as claimed in claim 2, wherein said upright element (18) is provided with latching means (22) for the rapidly romovably retention of said at least a second basket container (23).
4. (Currently Amended) A cart as claimed in claim 1, wherein said base (3) is shaped to allow a rapidly removable fitting engagement of said first basket container (15).
5. (Original) A cart as claimed in claim 1, further comprising means (24) for the rapidly removable connection between said base (3), said upright element (18) and said thrust part (5, 6).

**Amendment Under 37 C.F.R. § 1.111 w/annotated drawing sheets**  
**USSN 10/671,609**  
**Attorney Docket Q77785**  
**April 14, 2005**

6. (Currently Amended) A cart as claimed in claim 5, wherein said base (3) has an upwardly projecting rear support (9) formed with a concave seat (16) for the engagement of a first corresponding complementary end (17) of said upright element (18) or, respectively, of a second corresponding complementary end (20) of said thrust part (5, 6).

7. (Currently Amended) A cart as claimed in claim 6, wherein said upright element superiorly has a concave seat (19) for the engagement of said second complementary end (20) of the thrust part (5, 6).

8. (Original) A cart as claimed in claim 1, wherein said base (3) is provided with a pair of rear wheels (10) and with at least a single front wheel (13), which wheels may be fixed or swiveling.

9. (Original) A cart as claimed in claim 8, wherein said base (3) is formed, on one side and on the opposite side of said at least a front wheel (13), with respective upset-preventing appendages (14).

10. (Original) A cart as claimed in claim 1, wherein said base (3), said thrust part (5, 6) and said upright element (18) are made of moulded plastic material.
